

"This Oar or That Oar?" Sight Word #256 oar

I bought a canoe and ordered a set of **oars**
(canoes can use **oars** [attached] or paddles [not attached]).

One **oar** was perfectly shaped
while the other was unique.

Why was the **oar** unique?

It was made out of iron ore!

I had the receipt,
so I returned the unique *oar*.

Now, when I am in my canoe,
I row in circles.

Should I have kept both **oars**,
or should I have returned both *oars*?
