

# "Calendars"

Sight Word #298 calendar

My friend stole a **calendar**.  
The judge gave him 12 months.

Okay, time to be serious.

*Calendars* go back to the ancient world.

All civilizations had some type of *calendar*.

We know the lunar *calendar* is associated with the moon, and this has no impact on a person's behavior.

The Gregorian **calendar** we use today (with days, weeks and months) was inspired by the Julian **calendar**.

Notice, I did not force any rhyming or previous sight words...wait,  
"A bookkeeper with a **lavender calendar**..."  
*ha ha.*
