# cartilage

**Yes, your nose has  
cartilage.**

A close-up photograph of a green stick insect (Phyllotreta) resting on a green grass blade. The insect's body is elongated and segmented, with a mottled green pattern that blends perfectly with the surrounding grass. Its long, thin legs are also green and have small, reddish-brown spots at the joints. The background is a dense field of similar green grass blades, creating a natural camouflage environment.
