## [156 Responses From 25 Countries: FOI Requests Affirm That No Record of SARS-Cov-2 Isolation Exists Anywhere](#)

“As of January 4, 2022: **156 institutions and offices in over 25 countries** have responded thus far, as well as some “SARS-COV-2 isolation” study authors, and none have provided or cited any record describing actual “SARS-COV-2” isolation/purification.”

## [FOIs reveal that health/science institutions around the world \(156 and counting!\) have no record of SARS-COV-2 isolation/purification, anywhere, ever](#)

Would a sane person mix a patient sample (containing various sources of genetic material and never proven to contain any alleged “virus”) with transfected monkey kidney cells, fetal bovine serum and toxic drugs, then claim that the resulting concoction is “SARS-COV-2 isolate” and ship it off internationally for use in critical research (including vaccine and test development)?

Because that’s the sort of fraudulent monkey business that’s being passed off as “virus isolation” by research teams around the world.

Just 1 of many examples is shown below – this is from a study [cited by the Australian Department of Health](#) as a paper “*which led to the isolation of SARS-CoV-2 in culture*”. (Can you spot the oxymoron in that quote?)

## ***2.1 Cell culture of SARS-CoV-2 and electron microscopy***

Vero/hSLAM cells (African green monkey kidney cells transfected to express the human signaling lymphocytic activation molecule (SLAM; also known as CDw150)<sup>1</sup> were grown at 37°C, 5% CO<sub>2</sub> in maintenance media consisting of 10mL Earle's minimum essential medium (EMEM), 7% fetal bovine serum (FBS) (Bovogen Biologicals, Keilor East, AUS) 2mM L-glutamine, 1 mM sodium pyruvate, 1500mg/L sodium bicarbonate, 15 mM HEPES and 0.4mg/ml geneticin to 95% confluency in 25cm<sup>2</sup> flasks. Prior to use for isolation, maintenance media was removed from the flask and 500µL of respiratory swab inoculum was overlaid on the cell monolayer. The flask was returned to the 37°C incubator to allow the virus to adsorb for 1 hour before addition of 10 mL viral culture media (EMEM as above but FBS reduced to 2%). Flasks were monitored for viral cytopathic effect and 140µL aliquots of supernatant removed every 48 hours to assess virus burden by TaqMan real-time RT-PCR. First passage culture grown virus isolate was subsequently shipped nationally and internationally in packaging compliant with UN 2814 Category A shipping requirements using credentialed, specialised courier services under the appropriate Australian government export approvals processes and receiving country import permissions.

If you're new to the topic of "virus isolation/purification", I strongly recommend that you begin by reading the [Statement On Virus Isolation](#) by Dr. Andrew Kaufman, Dr. Thomas Cowan and Sally Fallon Morell or watch this [5 minute video](#) from Dr. Cowan. Or go [here](#) for many more resources, and corroborating evidence.

A [colleague](#) in New Zealand and I (CM) and many other people around the world have been submitting Freedom of Information requests to institutions in various countries seeking records that describe the isolation/purification of the alleged "COVID-19 virus" from any unadulterated sample taken from a diseased patient.

The reason: without the crucial step of isolation/purification having been performed (from many patients, followed by characterization, sequencing and controlled experiments), there is no way to claim scientifically that the alleged "novel coronavirus" (blamed for widespread death/disease /lockdown measures) actually exists.

Without this step having been performed and followed by characterization, sequencing and controlled experiments, all claims of this alleged "virus" are nothing but wild speculation backed only by fraudulent science, fraudulent tests and fraud-based diagnoses.

The requests submitted by my colleague in NZ and I (and many of the other submitters) have **not** been limited to records of isolation performed by the respective institution, or limited to

records authored by the respective institution, rather they were open to any records describing “COVID-19 virus” (aka “SARS-COV-2”) isolation/purification performed by anyone, ever, anywhere on the planet.

Thus far (January 4, 2022) 45 Canadian institutions have provided their responses: [Public Health Agency of Canada](#) (and another from [Public Health Agency of Canada](#), this one re the alleged “UK variant” aka “B.1.1.7” aka “Alpha”); and another from [Public Health Agency of Canada](#) re any alleged virus/variant, and another from [Public Health Agency of Canada](#) re ANY type of alleged virus at all), [Health Canada](#) (and another from [Health Canada](#); and another from [Health Canada](#)), the [National Research Council of Canada](#), [Vaccine and Infectious Disease Organization-International Vaccine Centre \(VIDO-InterVac\)](#), [Canadian Institutes of Health Research](#), [Natural Sciences and Engineering Research Council of Canada](#), [Patented Medicine Prices Review Board Canada](#), [Royal Canadian Mounted Police \(RCMP\)](#), [Public Health Ontario](#), [Ontario Ministry of Health](#) (and another from [Ontario Ministry of Health](#) re “delta variant”, [University Health Network](#), [Ontario Ministry of the Solicitor General and Ontario Provincial Police](#), [Alberta Ministry of Health](#), [Alberta Premier Jason Kenney, his Office and Executive Council](#), [Calgary Police Service](#), [Institut National de Sante Publique du Quebec](#) (another from [Public Health Quebec](#)), [British Columbia’s Ministry of Health](#) (re “the UK variant”), [British Columbia’s Centre for Disease Control](#), [British Columbia’s Provincial Health Services Authority](#) (2 responses, 1 re “SARS-COV-2”, 1 re the alleged “B.1.1.7” aka “Alpha variant” aka “UK variant”), [Vancouver Coastal Health Authority](#) (re “B.1.1.7” aka “Alpha variant” aka “UK variant”), [Newfoundland Labrador Department of Health & Community Services](#), [New Brunswick’s Department/Ministry of Health](#), [McGill University](#), [University of Ottawa](#), [University of Waterloo](#), [Dalhousie University](#), the [City of Toronto](#), [Toronto Police](#) (and another from [Toronto Police](#)), [Halton Region](#), [Hamilton Police Service](#) (Ontario), the [Region of Peel](#) (Ontario), [Region of Durham](#) (Ontario); [KFL&A Public Health](#) (Kingston, Frontenac, Lennox and Addington, Ontario, re “any variant”), [Grey Bruce Health Services](#), [Grey Bruce Health Unit](#), [Niagara Regional Police Service](#), [Peterborough Public Health \(Ontario\)](#), [Peterborough Police Service](#) (Ontario) (another from [Peterborough Police](#)), [Aylmer Police Service](#) (Ontario) (and another from [Aylmer Police](#)), [Woodstock Police Service](#) (Ontario), [Hastings Prince Edward Public Health](#) (Ontario), the [University of Toronto](#), [Sunnybrook Health Sciences Centre](#), [McMaster University](#) and [Mount Sinai Hospital](#) (Toronto) (note that researchers from the last 4 institutions had publicly claimed to have “isolated the virus”, as had VIDO-Intervac).

Every institution has failed to provide or cite even 1 record describing the isolation aka purification of the alleged “COVID-19 virus” directly from a patient sample that was not first adulterated with other sources of genetic material. (Those other sources are typically monkey kidney aka “Vero” cells and fetal bovine serum).

(And, to our knowledge, no one on the planet has ever purified the alleged “virus” even from a cell culture!)

For some insight into what’s really going on:

[Canadian public health officials have no record of SARS-COV-2 isolation/purification performed anywhere, ever](#)

As of January 4, 2022: **156 institutions and offices in over 25 countries** have responded thus far, as well as some “SARS-COV-2 isolation” study authors, and none have provided or cited any record describing actual “SARS-COV-2” isolation/purification. All of the responses in our collection are available from this page.

In their FOI responses, numerous institutions have made it explicitly clear that **isolation/purification is simply never done in virology**, and that “isolation” in virology means the exact opposite of what it means in everyday English. This is also evidenced in every “virus isolation” paper we have ever seen, for any alleged “virus”.

(Yes, we are aware of the many publications wherein authors claim to have “isolated the virus”. We’ve looked at numerous such studies and have yet to see one where they actually did so. Claiming to have done something and actually doing it are sometimes 2 different things, even in peer-reviewed science.

And yes we are aware of the many published alleged “SARS-COV-2 genomes” – these were in fact manufactured, not discovered.

And yes we are aware that EM photos have been published, allegedly of “the virus”, however a photo of something does not tell you what the thing is, where it came from or what it does. One has to scrutinize the Methods used to “isolate the virus” / obtain said photos / obtain alleged genomes, and that is when absolutely **everything** falls apart with “COVID-19” (and virology in general).
