Project Submission

Report

Complete the Report Document provided to you for Proposal writeup. In the **Appendix**, include:

- Code for your DDL statements, triggers, and stored routines
- Code for your front-end
- **Outputs** for the use cases tested to ensure that the queries and reports specified in the report are working correctly
  - Some outputs of your anticipated queries and report may be included in the main part of your report so long as they don't take away from the flow of the report.
  - The output section will influence your grade. Ensure it has an appropriate **table of contents and headings** to clarify what you intend to demonstrate.
    - Include SQL used along with the screenshots of the output.

Presentation

- Discuss the application domain, motivation, and benefits anticipated by your project
- Detailed Database Schema
- List of Constraints and Business Rules
- **Demonstration** of your application
- Time Split: 40% presentation + 60% for demonstration
