

Honesty Innovation Concentration Sharing

Company profile

Co., Ltd is a specialized plastic net manufacturer of Shading, Scaffolding and Fencing products for garden, domestic and construction. was founded in 1998, which locates in China and covers an area over 30000m², as one of the largest shading product manufacturers in China.

Frank X
General Manager

Over the years, has been constantly introducing advanced technologies and the latest design abroad. Major product lines include items such as Shade net, Shade sails, Scaffolding net, Fencing screen, Balcony screen, Bird netting, Insect netting, Anti hail net, Olive net and other ranges of plastic fabrics.

currently sells its products in China, Japan, the USA, the middle east, Europe, Southeast Asia, Australia, etc

employs over 200 people in local. We are recognised as a modern manufacturer in the plastic fabric fields. We are willing to work with our clients to create a better future under the principle“ Honesty, Innovation, Concentration, Sharing ”.

Debris Netting

PRODUCT SHEET

Features

- 1/16" mesh openings
- Light weight, tear resistant mesh
- Roll width: 4', 5'6", 8'6", 10', 12', 20'
- Roll length: 150 ft.
- UV treated
- Edges include reinforced eyelet button holes
- Flame Retardant available, meets NFPA 701 Test Method II
- Scaffold netting, guardrail netting, floor-to-floor netting

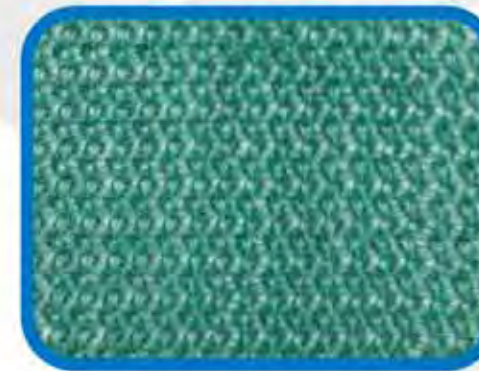

Benefits

- Protects dust, debris & tools from falling
- Protects workers, pedestrians & adjacent properties
- Creates a protective scaffolding enclosure
- Creates a wind block or shade cloth
- Provides a visual barrier for added privacy
- Tear resistant
- Will not unravel when cut

Safety Debris Netting

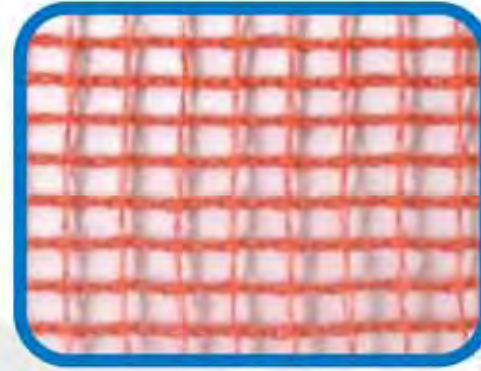

PRODUCT SHEET

Features

- High density knitted polyethylene mesh (HDPE)
- 1/4" mesh openings
- Lightweight, allows air to pass through
- Roll width: 2', 4', 5'6", 8'6", 10'6", 12', 15'
- Roll length: 150 ft
- Edges are hemmed and reinforced for fastening
- UV treated
- Flame Retardant available, meets NFPA 701 Test Method II
- Guardrail netting, floor-to-floor netting, scaffold netting

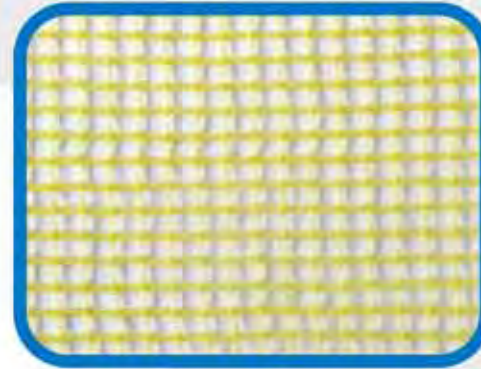

Benefits

- Protects dust, debris & tools from falling
- Protects workers, pedestrians, adjacent properties
- Creates a temporary guardrail
- Creates a visual barrier for safety
- Helps contain small, fasteners, tools, materials and debris
- Will not unravel when cut

Bale net wrap

100% NEW HDPE Bale Wrap Netting

Bale Net Wrap is a netting material made from polyethylene yarn by Raschel loom machine. Over the years, bale netting has become an attractive product with the use of wrapping hay. The bale net wrap has the following advantages when compared to twine:

- Reduced Time to Wrap
- Smooth Lay-Flat Bale Surface
- Ideal for Silage Bales
- Easy Removal
- End of Roll Making

Green Leaf CLASSIC 9840'

- Guaranteed Minimum Length. Every roll contains the guaranteed stated length, not a "plus-or-minus" average.
- Roll carry handles. Every roll of Green Leaf Bale Net is fitted with purpose carrying handles, to assist the operator in handling and carrying the roll.
- Direction Reminder.: The net goes smoothly in the right direction the first time. The marking caps in the two ends indicate the direction of rotation.
- Cordon: Roll end warning stripe. There is a colored stripe 75 meters before the end of the roll to remind you .

Green Leaf PLUS 7000' & 8000'

The PLUS has 20% MORE netwrap on the roll than the PRO 3000m net. Achieve greater protection for bales by reducing losses when transporting bales wrapped with net. Bales tied with string and loaded outside lose up to 15% of their mass through the wind and the rain. Bales wrapped using bale net have a better shape. So they are easier to transport and store. They conserve their nutrients longer, improving the quality of the straw and grass. Bales with a better shape offer greater protection against rainwater and humidity, making silage easier.

Green Leaf PRO 7000' & 8000'

- Super Core: Strengthened bobbin retains its reliability in difficult conditions and during transportation.
- The PRO length combines performance and consistency with a very high strength net, all within a workable roll weight.
- Bale longer without stopping to change rolls.

Product introduction

Anti bird net

Features:

- Material is 100% new HDPE and UV
- Any color is available
- Any size is available for width below 18m
- Useful life is 3-8 years

Useages: Bird net is made from high-density-polyethylene monofilament yarns ,which are knitted into an open mesh fabric. This bird netting can offer a light weight, and run resistant durable fabric.

Product introduction

Windbreak net

Features:

- Material is 100% new HDPE and UV stabilized
- Mesh size: 4mm-6mm
- Any color is available
- Weight: 40gsm-60gsm
- Width is below 6 meters
- Length is as your requirement

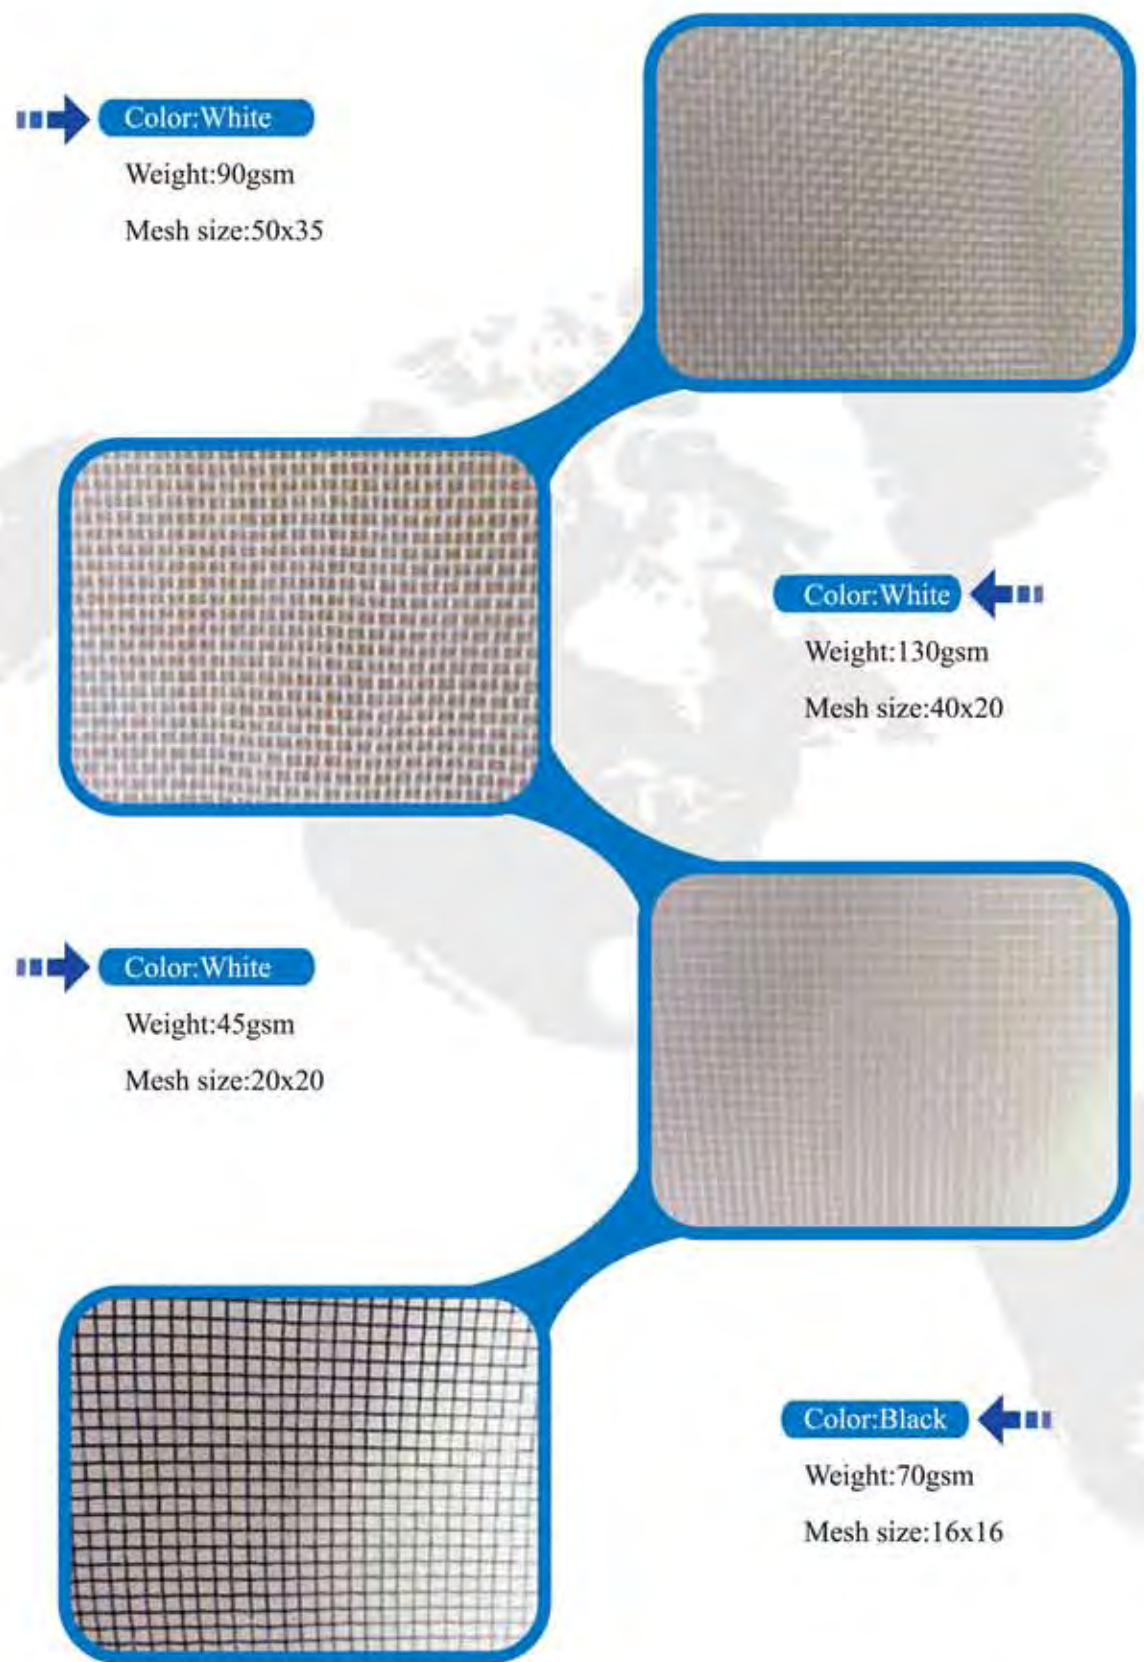

Product introduction

Anti insect net

- Material: 100% new HDPE and UV
- Color: any color is available
- Mesh : 15*15 20*20 40*40 25*50
- Weight: 80gsm-120gsm
- Long lasting insecticide treated anti-pest agricultural net→Counter measures of pesticides residues in vegetables
- Cover the vegetable or plant. Cultivate and produce fine nuisanceless vegetable by covering. It is anti-pest agricultural net anti-pest agricultural net.

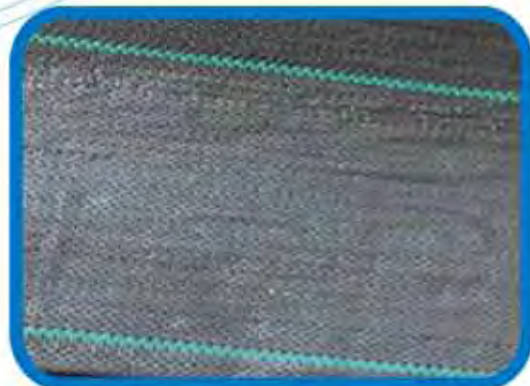

Product introduction

Weed control mat

- Material: 100% HDPE or PP
- Color: black or dark green
- Weight: 80gsm-120gsm
- Normal size: 2*5m 1*10m 1*20m 2*50m
- Weed mat, also known as "anti grass cloth", "ground cover", "weed barrier", is woven by polyethylene or polypropylene material.
- The products began to appear in the late 1970s and early 1980s and are widely used in agriculture, gardening field. It is mainly used for ground weed.

Product pictures

Product introduction

Anti animal net

The anti-animal nets can be used for holding animals in an enclosure, or keeping wild animals out and preventing any damage they may cause to the garden, fruits trees, and poultry. The lightweight design of the nets makes it flexible and easy to carry and install. The nets can also be installed to fit undulating terrains and landscapes, without leaving any gaps.

- Material is new HDPE and UV stabilizer
- Any size is available
- Any color is available
- Useful life is 3-10 years
- Width: below 6 meters
- Length: as your requirement
- Weight: 55-200gsm

37

Product introduction

Olive net

- Material: 100% HDPE
- Weight: 33gsm 90gsm
- Color: dark green
- Package: roll& piece
- Use: It is designed for collecting naturally fallen fruit .
- The sheets or rolls are laid out underneath the trees.

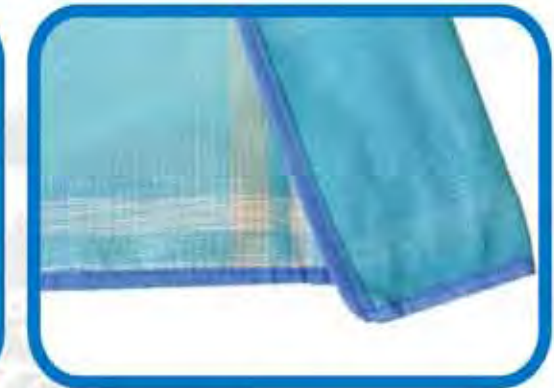

38

Product introduction

Sand free mat

- Sand free mat is designed for the beach and other outdoor activities.
- Sand falls straight through the beach mat and doesn't come back up .
- It also provides a smooth top surface,and can be easily cleaned .
- Material: new HDPE +UV
- Weight: 200gsm/layer
- Normal size: 1.3m*1.8m 1.8m*1.8m 2m*2m 2m*2.5m etc
- Color: can be customized , any color is available
- Accessory: reinforced edges with 4 D-rings in the corner.
