## What Is

For the past 20 years, [Company Name] has been operating in the nonwoven industry and wholeheartedly and continually provided safe and comfortable protective clothing to the users-whether you are working with liquid or solid chemicals, asbestos, paint, or in an environment which is full of oil and other pollutants.

## Our Mission

[Company Name] products always keep the commitment to you – BE SAFE! BE SURE! With this promise always in mind, [Company Name] continues to supply products of good quality, using our extensive experience and knowledge in the nonwoven industry. Our promise is not only to keep you safe and comfortable, but also to give a cost-effective solution. [Company Name] products are CE certified and delivered to you on time – bring you our promise wherever you need them.

## Certificates

TUV, EN ISO13485:2012,  
CE and FDA 510k certificates

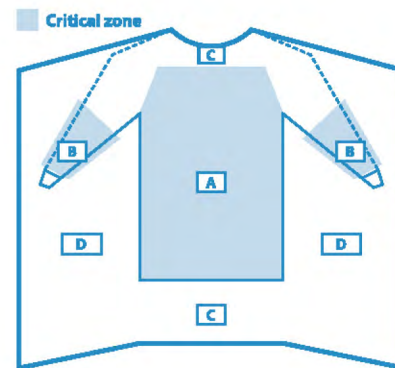

## WHAT IS EN 13795?

EN 13795 is a norm that has been approved by CEN on September 6, 2004 and is acknowledged as the European standard that controls and confirms the crucial requirements of all medical devices such as surgical gowns, drapes and clean air suits, both disposable and non disposable textiles.

### Parts of EN13795

1. Basic information for the manufacturers, converters and for the processors such as traceability processes and validation of all steps
2. Testing methods that evaluate specifications explained on Part 1 For instance; EN ISO 22610; resistance to wet microbial penetration  
EN ISO 22612; resistance to dry microbial penetration etc
3. Defining the minimum and maximum standards depending on the conditions of the surgical operations

EN13795-2:2004	
EN ISO 22610:2006	Resistance to wet microbial penetration
EN ISO 22612:2005	Protection against infection agents
EN ISO 9073-10:2003	Assessment of linting and particulate matter
EN 1174-2:1996	Microbial cleanliness
EN 13938-1:1999-wet	Determination of bursting strength
EN 29073-3:1992-wet	Determination of the breaking strength and elongation

The entire front of a surgical gown (areas A, B and C), including the seam and other components, is required to provide a minimum level of barrier protection (Level 1). Since the back of the gown (area D) intended for surgical applications is expected to stay dry, there is no liquid barrier performance requirements for that area. The critical zones of a surgical gown (areas A and B) can be constructed to provide increased protection (Level 2, 3 or 4). The classification of the entire surgical gown is based on the lowest level of protection within the critical zones.

### Critical zones

The barrier requirements for surgical gowns are based on the location and degree of liquid contact expected during use. The critical zones include those areas where direct contact with blood, body fluids and OPIM are most likely to occur.

## Comfort and Protection

Surgical Gowns provides you a unique balance of comfort, value and protection. We have considered the variety of procedures you work on everyday and ever-changing conditions associated with them.

**MexGown™**

Standard gown made of fluid-repellent nonwoven fabric with a micro-fiber middle layer. High resistance to fluids and bacteria penetration, abrasion-resistant and low-linting.

**MexForce™**

Reinforced gown giving you maximum protection. Made from 5-layers propylene materials with anti-static and fluid resistance.

**MexGuard™**

High Performance Surgical Gown with increased breathability and comfort. Made from 5-layers Polypropylene materials with alcohol, blood, anti static and fluid resistance.

## What will you be wearing?

It's important to choose the right gown for the right procedure. Clinicians and surgeons should begin the surgical gown selection process by considering the following test.

### Strike-through resistance test (in cm)

↑ Higher is better

### Puncture resistance test (in psi)

↑ Higher is better

### Strength test (machine direction in lbs.)

↑ Higher is better

### Lint test (in number of particles ≧ 1micron)

↓ Lower is better

# Surgical Drapes and Packs

## Surgical Drape Packs Provide A Convenient Solution For Everyday Draping

### Absorbent

The absorbent qualities of the fabric controls and contains fluid, reducing clean-up time, potential exposure to body fluids and risk to staff from fluid on the floor.

### Impervious

The fluid control and impervious features of the fabric mean that only a single layer of drapes is required. Our surgical drapes are impervious to liquid strike through which can help to reduce bacterial transfer and subsequent contamination of the surgical site.

### Adhesion

3M is a leader in adhesive technology and has applied this expertise to provide surgical drapes with consistently reliable adhesion to the skin. Thanks to our reliable partner 3M, we are able to ensure the adhesion of all surgical drapes and pack.

## Guide to Protective Materials

P/31

To eliminate confusion, here's a brief description of the main materials we use in the construction of protective apparel.

### Spunbond Polypropylene

The standard fabric for basic protective apparel; formed by bonding fibers together to form a single layer of breathable, woven-like material. Its main advantages are economy and comfort, and it also provides light fluid protection.

### Coated Polypropylene

Created when soft, spunbond polypropylene is coated with a layer of impervious polypropylene. This light weight material is ideal for any situation demanding a high level of fluid protection.

### Multi-Ply Material

A multi-ply material consisting of layers of meltblown polypropylene between layers of spunbond polypropylene. Strong, fluid-resistant and breathable, this multi-layer material provides an optimal mix of protection and comfort. Appropriate for extended wear situations involving low to moderate fluid contact.

### Breathable Laminate

Microporous film bonded to nonwoven material provides fluid proof protection and great breathability. This material is ideal for extended wear conditions where fluid contact is expected.

## Levels of barrier Protection

The Isolation Gowns with color coding neck bindings meet the test requirements set forth by Association for the Advancement of Medical Instrument (AAMI) PB70.

The chart below is set forth in the AAMI PB70 guidelines. The color coding has been developed by to differentiate each level and corresponds with the color coding neck bindings on the AAMI Compliant Isolation Gowns.

ANSI/AAMI PB70 Barrier Performance	Test Method	Test Definition	Requirement
Level 1	Water resistance: Impact Penetration AATCC 42	AATCC 42 Measures the resistance of fabrics to the liquid penetration of water by impact	Water impact $\leq 4.5g$
Level 2	Water resistance: Impact Penetration AATCC 42 Water Resistance: Hydrostatic Pressure AATCC 127	AATCC 127 Measure the resistance of fabrics to the liquid penetration of water by impact	Water impact $\leq 1.0g$ Hydrostatic pressure $\geq 20cm$
		AATCC 127 Measure the resistance of fabrics to the liquid penetration of water by impact under constant and increasing hydrostatic pressure.	
Level 3	Water resistance: Impact Penetration AATCC 42 Water Resistance: Hydrostatic Pressure AATCC 127	AATCC 127 Measure the resistance of fabrics to the liquid penetration of water by impact	Water impact $\leq 1.0g$ Hydrostatic pressure $\geq 50cm$
		AATCC 127 Measure the resistance of fabrics to the liquid penetration of water by impact under constant and increasing hydrostatic pressure.	
Level 4	Viral Penetration ASTM F1671	ASTM F1671 Measures the resistance of fabrics to blood borne pathogens using viral penetration at 2psi and ambient pressure.	Total impervious

## AAMI APPROVED GOWNS

- Level 1 Protection
- Level 2 Protection
- Level 3 Protection
- Level 4 Protection

P/32

### Level 1 Protection

Breathable Polypropylene Maximizes Comfort in Dymex's Classic Isolation Gowns

Code	Product Name	Specification	Packaging
AAMG01	AAMI Gown	Light weight multiply material SMS 20gsm. Tape tab neck, elastic wrist	10pcs/bag, 100pcs/case

### Level 2 Protection

Dymex's Classic Yellow Medium Weight Multi-Ply Gowns are breathable, flexible and strong enough for the toughest.

Code	Product Name	Specification	Packaging
AAMG02	AAMI Gown	Medium weight multiply material SMS 25gsm. Tape tab neck, elastic wrist	10pcs/bag, 100pcs/case

### Level 3 Protection

Premium Comfortable and Breathable Multi-Ply Gowns provides high protection

Code	Product Name	Specification	Packaging
AAMG03	AAMI Gown	heavy weight multiply material SMS 35gsm. Tape tab neck, elastic wrist	10pcs/bag, 100pcs/case

### Level 4 Protection

Prevention Plus Isolation Gowns offer protection from the heaviest fluids.

Code	Product Name	Specification	Packaging
AAMG04	AAMI Gown	multiply BVB material 68gsm. Knitted cuff, hook and loop, neck closure	10pcs/bag, 100pcs/case

## ISOLATION GOWNS

- Impervious Isolation Gown
- Chemotherapy Gown

P/34

### Impervious Isolation Gown

- PP+PE Lamination Fabric
- Excellent Fluid Repellent
- One Waist Belt
- Stitched Sewing Or Ultrasonic Seam
- Over The Head Neck Style or Classic Style
- Knitted Cuff, Elastic Cuff Or Thumb Up
- Latex Free

Code	Product Name	Specification	Packaging
ISGIM01-35	Impervious Isolation Gown	PP+PE 35gsm.	10pcs/bag,100pcs/case
ISGIM02-40	Impervious Isolation Gown	PP+PE 40gsm.	10pcs/bag,100pcs/case
ISGIM03-45	Impervious Isolation Gown	PE 1.5MIL	15pcs/box,75pcs/case

Note: All Dymex gowns are available in different colors and all are latex-free.

### Chemotherapy Gown

- Half PP+PE Lamination
- Fluid Repellent
- Breathable
- One Waist Belt
- Stitched or Ultrasonic Welding
- Knitted Cuff
- Latex Free

Code	Product Name	Specification	Packaging
CTG01-35	Chemotherapy Gown	Half Lamination PP+PE 35gsm.	10pcs/bag, 100pcs/case
CTG02-40	Chemotherapy Gown	Half Lamination PP+PE 40gsm	10pcs/bag, 100pcs/case

### Chemotherapy Drug Tested

Prevention Plus gowns are tested against the top chemotherapy drugs.

The Prevention Plus Material has been tested against the following chemotherapy drugs per ASTM F739-99a:

- Dacarbazine
- Carmustine (BiCNU)
- Cyclophosphamide (Cytoxan)
- Doxorubicin Hydrochloride
- 5-Fluorouracil
- Cisplatin
- Etoposide (Toposar)
- Paclitaxel (Taxol)
- Thio-Tepa
- Mitomycin C
- Vincristine Sulfate

(Test data available upon request)

sonically-sealed seams provide a higher level of protection

## A WIDE SELECTION OF COVERALLS FOR EVERY SITUATION

Heavy fluids and tough jobs require a strong and protective material such as our microporous breathable material. Try our Spunbond Coveralls.

P/38

### Breathable Coveralls

- Made from microporous breathable laminate material
- Maximum protection- ideal for maternity or the OR
- Comfortable for extended periods
- Available in white

Item No.	Description	Pkg
CV3000L-XXL	Straight Wrist and Ankle	5 pcs/bag,25bags/ctn
CV3000L-XXXL	Elastic Wrist and Ankle	5 pcs/bag,25bags/ctn

### Multi-Layer Coveralls

- Made from fluid-resistant material
- Good combination of comfort and protection
- Available in white

Item No.	Description	Pkg
CV2000L-XXL	Elastic Wrist and Straight Ankle	5 pcs/bag,25bags/ctn

Need coverage for light jobs or to cover clothing?

### Standard Spunbond Coveralls

- Made from medium weight polypropylene material
- Highly breathable, fluid repellent material
- Available in white

Item No.	Size	Description	Pkg
CV1000	X-Large	Straight Wrist and Straight Ankle	5 pcs/bag,25bags/ctn
CV1000	XX-Large	Straight Wrist and Straight Ankle	5 pcs/bag,25bags/ctn

### Poly Disposable White Apron

Effective protection against liquids and waste.

.Made from polyethylene material

.Available in two lengths to protect the torso

.Convenient pullover styling for the quick and easy removal

Item No.	Size	Pkg
PA2000	41" * 62"	10pcs/bag,100pcs/ctn

Item No.	Description	Pkg
PA1001	Lightweight,24" * 42"	100cs/box,1000pcs/ctn
PA1002	Medium weight,28" * 46"	100cs/box,500pcs/ctn
PA1003	Medium weight,28" * 46"	50cs/box,250pcs/ctn
	Individually Wrapped,Dispenser Box	

### Heavyweight Blue Apron

Provides highest level of protection against fluids.

.Made from heavyweight 4 mil plastic

.Complete protection for the OR,ER,decontamination,morgue or any area where heavy fluids are present

.Styled to easily pull over the head and tie in back

# WHY MEXGUARD™ MASK

## Enhanced Safety and Performance!

### ASTM LEVEL 3

#### Meets EN 14683 Rating- Type IIR Standard

##### High Filtration, Fluid-Resistant Mask

- \*BFE=99.9% @3 microns.
- \*PFE=99.9% @0.1 micron.
- \*Patent pending design with aluminum strip under chin for custom fit.
- \*Fluid resistant outer layer
- \*White hypoallergenic inner cellulose layer
- \*Extre soft-will not link, tear or shred.
- \*Free of chemicals, inks and dyes.
- \*Extra-long aluminum nose piece

### ASTM LEVEL 2

#### Meets EN 14683 Rating- Type IIR Standard

##### Procedural Surgical Mask

- \*BFE=99.8% @3 microns.
- \*PFE=99.7% @0.1 micron.
- \*Patent pending design with aluminum strip under chin for custom fit.
- \*Fluid resistant outer layer
- \* Fluid resistant white inner layer
- \*Extra-long aluminum nose piece

### ASTM LEVEL 1

#### Meets EN 14683 Rating- Type IIR Standard

##### Isolation Face Mask

- \*BFE=98.4% @3 microns.
- \*PFE=98.5% @0.1 micron.
- \*Patent pending design with aluminum strip under chin for custom fit.
- \*Fluid resistant outer layer
- \* white tissue inner layer
- \*Extra-long aluminum nose piece

### LOW PERFORMANCE

#### Universal Face Mask

- \*BFE=95 % @3 microns.
- \*PFE=95% @0.1 micron.
- \*Patent pending design with aluminum strip under chin for custom fit.
- \*Fluid resistant outer layer
- \* white tissue inner layer
- \*Extra-long aluminum nose piece

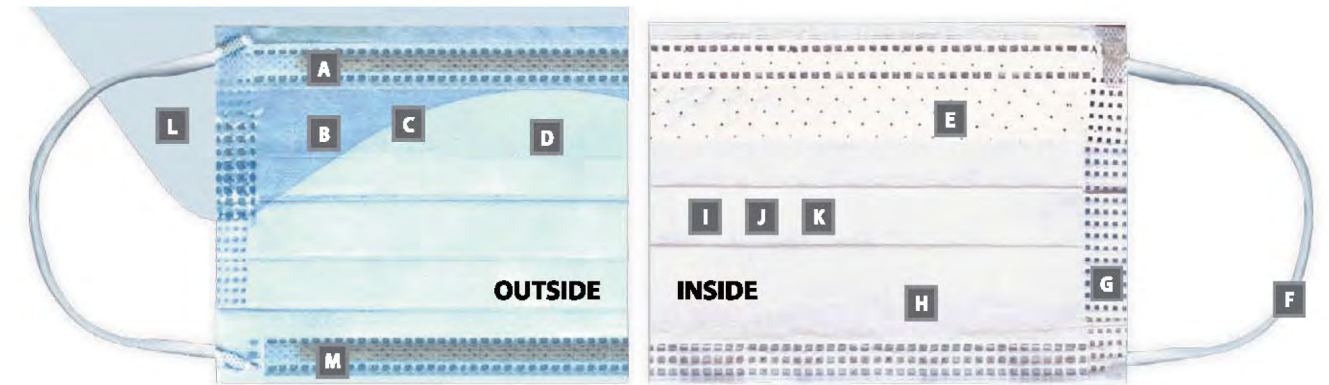

### COMFORTABLE 3D PERFORMANCE

#### 3D Mask

- \*BFE=98.4% @3 microns.
- \*PFE=98.5% @0.1 micron.
- \*Patent pending design with aluminum strip under chin for custom fit.
- \*Fluid resistant outer layer
- \* white tissue inner layer
- \*Extra-long aluminum nose piece

MEXGUARD offers a wide variety of mask designs, fit and filtration to match the protection needs for each procedure or risk level. The MEXGUARD Mask filtration guide makes it easy to select the level of filtration required, including ASTM level 1, 2 and 3 and N95 particulate respiration. From minimum performance masks for dry, short procedures, to our maximum filtration mask, Isolator Plus, MEXGUARD has the right mask for the task!

- A** Extra-long, enclosed aluminum nose piece forms a strong seal for maximum protection.
- B** Spunbond outer layer material for maximum protection against fluids.
- C** Facial tissue outer layer is ultrasoft and odorless.
- D** Vapor barrier uniquely placed on outside layer to prevent fogging.
- E** Fog Free/No-Fog strip blocks and absorbs moisture; forms a strong seal to prevent fogging; cushion nose ridge.
- F** Secure Loop earloops are soft, strong, fit comfortable, and attached to outside of mask to eliminate irritation.
- G** Soft-Bond ultrasonics ensures strongest construction, eliminating holes and defects.
- H** Highest quality filter media for best ASTM rating, filtration value and breathability.
- I** Cellulose Inner layer for sensitive skin(white, extra soft, hypoallergenic) will not lint, tear or shred; void of dyes, inks and chemicals, which can cause irritation.
- J** Tissue inner layer is made of white, soft facial tissue.
- K** Spunbond inner layer made of white, fluid-resistant material.
- L** Attached wrap-around face shield is optically clear and distortion-free.
- M** Aluminum strip under chin significantly reduces gapping at the top, sides and bottom of the mask.

## Understanding ASTM Face Mask Performance Levels

Selecting the appropriate mask for a particular procedure is a critical component of your Personal Protective Equipment (PPE) protocol. Although masks may look similar, each mask has notable differences affecting the quality and level of filtration. Understanding the ASTM performance level of each face mask can help make the selection process easier and ensure your

mask will provide the appropriate filtration. Medical face mask materials covered under ASTM specifications are designated as one or more of the following performance levels based on the barrier performance levels based on the barrier performance properties of the materials used:

	ASTM Level 1	ASTM Level 2	ASTM Level 3
FLUID RESISTANCE, mmHg	80	120	160
BFE	98%	98%	95%
PFE, @0.1micron	95%	98%	98%
DELTA P, mmH2O /cm2	4.0	5.0	5.0
FLAME SPREAD	Class 1	Class 1	Class 1

## What the terms mean:

**FLUID RESISTANCE** represents the mask's resistance to penetration by synthetic blood under pressure (mmHg). It measures the ability of a mask's material construction to minimize fluids from traveling through the material and potentially coming into contact with the wearer. The higher the fluid resistance (filtration), the better the protection.

**BFE(Bacterial Filtration Efficiency)** represents the percentage of bacteria filtered out at a spore size of 1-5 microns. It is the measure of the efficiency of the mask in filtering bacteria passing through it.

**PFE(sub-micron Particulate Filtration Efficiency)** represents the percentage of particles filtered out at a spore size of 0.1-1.0 microns. PFE is the measure of the efficiency of the mask in filtering particles passing through it. The size of the particles filtered is critical.

**DELTA P (Differential Pressure)** represents the pressure drop across the mask or resistance to air flow in mmH2O/cm2. This determines breathing resistance - the higher the Delta P, the less the breathability, but the better the filtration.

**FLAME SPREAD** measures flame spread of the mask material  
SOURCE: ASTM Standard specification for performance of materials used in medical face masks- F2100-11 Standard.  
As specified in Test Method F 1862

## HEADWEARS

### Bouffant Caps

- Choose from lightweight single-ply polypropylene or heavyweight spunbond material
- Available in solid blue, green, red and white
- Available in 21" and 24"
- All caps comply with NFPA standards

Code	Product Name	Specification	Packaging
BCP1000	Bouffant Cap	21", Blue/Green/White/Pink	100pcs/box, 300pcs/case
BCP1001	Bouffant Cap	24", Blue/Green/White/Pink	100pcs/box, 300pcs/case

### Surgeons' Cap

You're sure to find the style you need in our expanded line of surgeons' caps.

Choose from three different materials:

- SRM** – Scrim reinforced material, a paper-like absorbent material
- Multi-Layer Polypropylene** – Highly fluid-resistant, yet breathable
- Spunlace** – Extremely soft, comfortable and most absorbent

Code	Side Material	Crown Material	Color	Packaging
SCP1000	SRM	Polypropylene	Light Blue	100pcs/box, 500pcs/case
SCP1001	Multi-Layer	Polypropylene	Dark Blue	100pcs/box, 500pcs/case
SCP1002	Spunlace	Spunlace	Medium Blue	100pcs/box, 500pcs/case

### Surgeons' Hood

Complete head coverage

- Available in multi-layer material
- Ties in back of head

Code	Specification	Color	Packaging
SCP1000	Multi-Layer Material	Light Blue	100pcs/box, 500pcs/case

### Surgeons' Head and Beard Covers

- Complete head coverage
- Made of multi-layer material with an elastic neck
- Beard cover is made of spunbond polypropylene, stays in place with an elastic band
- One size fits most

Code	Specification	Color	Packaging
SCP1000	Multi-Layer Material	Light Blue	100pcs/box, 500pcs/case

## FOOTWEARS

### Non-Skid Multi-Layer Shoe Covers

- Made from breathable, fluid-resistant material
- Sport size available for larger, athletic-type shoes

Item No.	Size	Pkg
NSDSC01	Regular Size (up to men's size 12)	100/bx, 300/cs
NSDSC02	X-Large (up to men's size 15)	100/bx, 200/cs
NSDSC03	Sports Size (fits athletic shoes)	100/bx, 200/cs

### Polyethylene Shoe Covers

- Made from CPE plastic material that resists high levels of fluid
- Smooth bottom

Item No.	Size	Pkg
PESC01	One Size Fits Most	1000/cs

### Breathable Knee-High Boot Covers

- Rated number one for breathability and complete protection
- Made from Blue coated material
- Hook-and-loop closure strap allows for a snug fit
- Foam strip non-skid bottom

Item No.	Size	Pkg
BCV01	Regular Size (up to men's size 12)	50/bx, 150/cs
BCV02	X-Large (up to men's size 15)	50/bx, 150/cs

- Non-Skid Multi-Layer Shoe Covers
- Polyethylene Shoe Covers
- Breathable Knee-High Boot Covers

- Non-Skid Fluid-Proof Boot Covers
- Non-Skid Multi-Layer/Poly Knee-High Boot Covers
- Non-Skid Multi-Layer/Poly Ankle Covers

## FOOTWEARS

### Non-Skid Fluid-Proof Boot Covers

- Made from fluid-proof coated polypropylene material
- High fluid protection on the bottom
- Convenient hook-and-loop strap allows wearer to adjust the fit
- Strap is heat-sealed to boot
- Available with non-skid pattern or foam strip

Item No.	Size	Pkg
BCV03	Regular (up to men's size 12)	50/bx, 150/cs
BCV04	X-Large (up to men's size 15)	50/bx, 150/cs

### Non-Skid Multi-Layer/Poly Knee-High Boot Covers

- Breathable, fluid-resistant material above the ankle
- High fluid protection on the bottom
- Heat-sealed seams on foot reduce the chance of fluid penetration

Item No.	Size	Pkg
BCV05	Regular (up to men's size 12)	50/bx, 150/cs
BCV06	X-Large (up to men's size 15)	50/bx, 150/cs

### Non-Skid Multi-Layer/Poly Ankle Covers

- Designed for users who want full foot coverage without wearing a boot cover
- Impervious bottom with breathable material above the ankle
- Same heat-sealed seams and non-skid tread as boot cover design

Item No.	Size	Pkg
BCV07	Regular (up to men's size 12)	100/bx, 300/cs
BCV08	X-Large (up to men's size 15)	100/bx, 300/cs

## Qualification
