

**U Series earplug is specifically designed for those people who expose themselves to environments with hazardous high noise levels.**

U Series

**U020 fly earplugs** is a pressure regulating universal fit hearing protector designed specifically for fit hearing protector designed specifically for flying.

Our advanced filter technology reduces background noise whilst allowing speech and flight announcements to be heard more clearly. Meanwhile, wearing U020 earplug can regulate pressure between ears and cabin when planes take-off and land.

**U023 gardening earplug** brings the sound down to a safe level so users can enjoy cutting the Grass.

#### **U025 sleeping earplugs**

A moderate snorer reaches 50-60dB whilst severe snoring can hit 90dB. Sleep earplugs reduces the sound level 25dB, eliminating or reducing sound to a non-intrusive level.

Sleeping with ear tips will take a little getting used to, as it can sound unnaturally quiet for the first night. After that you'll wonder why you didn't use them earlier.

**U027 industry earplugs** reduces the sound level up to 28dB making it safe for 8 hours continuous use in any environment up to 110dB. All Industry earplugs can be combined with earmuffs in very loud situations so that can get dual protection.

**Feature:**

- Volume reduction without affecting the sound clarity, It can filter the noise but does not affect communication.
- Comfortable for prolonged wear our earplugs are made of natural hypoallergenic silicone material that is transparent and comfortable. With precise triple flange design and tapered shape, the earplugs ensure a great fit for all ear sizes, maintaining comfort during prolonged use.
- Rigorous standards & Reliable performance  
Goes through a rigorous European CE quality control process and certification to ensure a high standard of quality with highly reliable performance.
