**Toys is the most professional electronic playmat manufacturer in the world since 1991 and is dedicated to focus on child development, better technology and sustainable manufacturing.**

### Child Development

#### 12months to 3 years

Between the ages of one and three, children are beginning to leave the stage of babyhood and become a toddler. He/she has gained many new skills and has a high level of energy. Our toys are designed to help children to improve muscle strength, hand-eye coordination and balance.

#### 3 years +

By this age, children have come a long way on the path towards independence. They are curious, energetic, sociable, and getting ready for kindergarten, and may have attended a playgroup or preschool. Our playmat items help to enhance fine motor skills and develop imagination and creativity.

### Technology

We have always invested large amount of fund and time to improve technology. Wireless, camera, Bluetooth, conductive sensor and many other main technologies that we see in daily life have been applied to our toys.

### Sustainable Manufacturing

... commits itself to use sustainable materials. Quality Assurance testing is conducted with state of the art equipment at an on-site laboratory prior to sending toys out for third party international testing. Sun Lin products exceed international safety standards including both ASTM (USA) and EN71 (Europe). ISO 9001, ICTI, Sedex, GSV are certificates for achieving world-class product quality and service standards.
