We manufacture National Flags of all countries and states in the world. The flags are produced on 100 % polyester fabric to ensure a long life for outdoor use.

The flags can be made in two different kinds of forms:

Vertical National Flags

Vertical Flags are printed and confectionated so that the long side is hoisted on the flagpole and the short side flies freely. Because the flag is shorter, even the breeze flies the flag freely.

Horizontal National Flags

This is the classic form for National Flags. In this case the short side is hoisted on the flagpole. The size of the flag may vary with the size of the flagpole.

Industry offers you a chance to visualize your marketing conception in a **perfect way**.

Rich and brilliant colours, **best quality** is our profession.

We produce **high quality Advertising Flags** according to your specifications.

Our state of the art facilities for flag printing guarantee your ideas will be **implemented accurately and competently**.

Colourfully printed Advertising Flags are an amazing resource for decorative purposes. It shows your message high and builds a positive image in the mind of the viewers.

On most of our fabrics, we are able to penetrate perfectly to the reverse side of the flag.
