

PLASTIC PALLETS

As one of the two key innovations in logistics industry in 21st century , pallet has been widely applied to production, delivery, loading and unloading, transportation, storage and circulation as well as distribution, etc.

More economic benefit will be created when the coordination and perfection between production and logistic structure are promoted effectively.

Being the professional enterprise on producing, selling and distributing the pallet ,

Plastics has 12 series, over 200 kinds of products and its annual sales over RMB 100 million .

We persist in recommending the best to customers. This category collects our star products, which are made of PP or PE and processed with different technology. Featured with light weight and solid quality, beauty appearance and durable performance, it is easy to clean, anti-static and recoverable, it will must be your good assistant.
